

AMENDMENTS TO THE SPECIFICATION:

Replace paragraph 0046 with the amended paragraph as follows:

[0046] The zone Z5 corresponds to the connecting zone 7. The transition zone T4 is located between Z4 and Z5. This transition zone corresponds substantially to the inner flank 8 of the mounting groove 9. It will be appreciated that all portions of the zone Z5 lying in an imaginary plane P extending through the zone Z5 perpendicularly to the rim's axis of rotation are spaced equidistantly from the axis of rotation.
